

## **AMENDMENTS TO THE CLAIMS**

The following is a complete, marked up listing of revised claims with a status identifier in parentheses, underlined text indicating insertions, and strikethrough and/or double-bracketed text indicating deletions.

### **LISTING OF CLAIMS**

1. (ORIGINAL) A recording medium having a data structure for managing to resume reproduction of at least video data recorded on the recording medium, having data recorded thereon, the data comprising:  
  
at least one data playing unit including the video data; and  
  
navigation information for managing the data playing unit,  
  
wherein the navigation information includes control information to indicate whether resumption of the data playing unit is permitted or not.
2. (ORIGINAL) The recording medium of claim 1, wherein the data playing unit is a title or a program chain.
3. (ORIGINAL) The recording medium of claim 2, wherein the control information is recorded in a program chain information table pertaining to the navigation information.
4. (ORIGINAL) The recording medium of claim 1, wherein the data playing unit is a data section specified by a movie object constituting a title.

5. (ORIGINAL) The recording medium of claim 4, wherein the control information is recorded in the movie object pertaining to the navigation information.

6. (ORIGINAL) The recording medium of claim 1, wherein the navigation information further includes commands to conduct operations according to value of the control information.

7. (ORIGINAL) The recording medium of claim 1, wherein the control information is applied when menu presentation is called during reproduction of the data playing unit.

8-12. (CANCELLED)

13. (ORIGINAL) A method for recording a data structure for managing to resume reproduction of at least video data on a recording medium, comprising:

recording at least one data playing unit including the video data on the recording medium;  
and

recording navigation information for managing the data playing unit on the recording medium,

wherein the navigation information includes control information to indicate whether resumption of the data playing unit is permitted or not.

14-16. (CANCELLED)

17. (ORIGINAL) An apparatus for recording a data structure for managing to resume reproduction of at least video data on a recording medium, comprising:

a drive for driving an optical recording means that records data on the recording medium;

an encoder for encoding the video data; and

a controller for controlling the drive to record the encoded video data as at least one data playing unit on the recording medium, and for creating navigation information for managing the data playing unit and controlling the drive to record the created navigation information on the recording medium,

wherein the navigation information includes control information to indicate whether resumption of the data playing unit is permitted or not.

18-28. (CANCELLED)
